

Dear Sterling Families,

This year our teachers are teaming up to provide our classes with additional exploratory classes. Three days a week, your child will participate in a grade-appropriate, 30 minute rotation for Health, Science, and Social Studies. We are excited to be able to have this designated time in our schedules to allow students this personalized learning experience. If you have any questions, please do not hesitate to call or email the teacher directly.

Sincerely,

Krystal Duval, Megan King and Serina Montgomery

### Science

This year in Science we are going to “take chances, make mistakes and get messy!” -Ms. Frizzle. We will begin by learning about the scientific method and making observations using our five senses. We will then cover topics like: plants and animals, motion, light and sound, weather, and space. I look forward to working with your child. Please contact me if you have any questions and/or concerns.

Ms. Duval

### Health

I will teach Health this year using The Great Body Shop curriculum. Your child will receive their own copy of The Great Body Shop Student Issue for all units. The topics include: nutrition, illness prevention, drug and alcohol prevention, safety and other health related topics. Each unit contains information to help your child understand his/her own body, the way it works, and the best ways to keep it healthy. Please feel free to contact me via email if you should have any questions and/or concerns.

Mrs. King

### Social Studies

I will teach Social Studies this school year starting with a focus on self, family, community, and citizenship. We will also cover the following topics: leadership (what makes a great leader and how can I become a leader in my classroom), wants versus needs and a brief lesson on where we are in the world (state, city and school). I am excited for the opportunity to work with your child. Please do not hesitate to contact me with any questions and/or concerns.

Mrs. Montgomery
